INTERNATIONAL SEARCH REPORT

International application No. PCT/US01/19110

Во	×1 C	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
Thi	s inter	national report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.		Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2.		Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3.	x	Claims Nos.: 51-80, 84, 87-96 because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Во	ı II x	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
Th	is Inte	mational Searching Authority found multiple inventions in this international application, as follows:
	Pl	ease See Extra Sheet.
1.		As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2.		As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.		As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4.	X 1	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: , 3-50, 85 & 86, as they pertain to SEQ ID NO: I
Re	mark	on Protest The additional search fees were accompanied by the applicant's protest.
		No protest accompanied the payment of additional search fees.

International application No. PCT/US01/19110

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION WAS LACKING This ISA found multiple inventions as follows:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1. In order for all inventions to be searched, the appropriate additional search foes must be paid.

Groups 1-2128, claims 1, 3-50, 85 and 86, all in part, drawn to an antibody that immunospecifically binds to BLys comprising a first amino acid sequence at least 95% destinat to a second amino acid sequence selected from the group consisting of an amino acid sequence comprising either the sequence of a VHCDR or a VLCDR of any one of the ScPus of SBQ ID NO: 1 through 2128. For example, if Group 1 is elected, this correlates to the claimed antibody, wherein the said second sequence correlates to a CDR of clone ID 1005P125, i.e., the second sequence comprises an HCDR of SBQ ID NO: 1. With regard to claims 85 and 85, the claims are drawn to an antibody, that immunospecifically binds to BLys, the said antibody comprising an amino acid sequence of a VH or a VL domain of an explosure that hybridizes under stringent conditions to a nucleotide sequence encoding a VH or a VL domain of an explosure of any one of SBQ ID NO: 1 to 2128.

Groups 2129-3227, claims 1 and 2, all in part, drawn to an antibody that immunospecifically binds to BLys comprising a first antino soid sequence at least 95% (derical to a second antino acid sequence where the said second mino acid sequence consists of the antino acid sequence of a VHCDR3 of any one of the scPvs of SEQ ID NO: 2129-3227. For example, if Group 2129 is elected, this correlates to the claimed antibody, wherein the said second sequence correlates to a VHCDR3 of close ID 1003A08, i.e., the second sequence consists of the sequence of a VHCDR3 of SEQ ID NO: 2129-2129.

Group 3228, claim 81, drawn to an antibody which inhibits the binding of the antibody produced by ATCC PTA-3239 to BLys.

Group 3229, claim 82, drawn to an antibody which inhibits the binding of the antibody produced by ATCC PTA-3240 to BLys.

Group 3230, claim 83, drawn to an antibody which inhibits the binding of the antibody produced by ATCC PTA-3243 to BLvs.

The inversions listed as Groups 1-2230 do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The autibodies of each invention are unrelated each to the other. The antibodies of each invention have different structures, and are therefore different products which are not coextensive and which do not share the same technical feature.
